

**invis is**  
more  
comfortable,\*  
less painful,†  
faster.‡§

**invis is**  
with them  
from day one  
to day done.

Your teen is unique, and so is their smile. It's part of what makes them so special. Invisalign® treatment is based on more than 20 years of research, experience, and data from transforming millions\*\* of unique smiles.

So when you trust their smile to Invisalign aligners, together with the expertise of your doctor, you know your teen's teeth are in the best of hands.

**invis is**  
the predictability  
you need.

- 1 With advances such as SmartTrack® material, their smile will be shaped predictably.\*\*\*
- 2 Invisalign® aligners are less painful than braces.†
- 3 Treatment with Invisalign aligners is completed faster, on average, than treatment with braces.‡§
- 4 Since Invisalign aligners are removable, your child can still:
  - Brush and floss as usual, meaning better oral hygiene.
  - Eat and drink what they want.
  - Continue the activities they love, such as playing sports, and not have to worry about breaking wires or brackets.
- 5 With nothing sharp in your teen's mouth, you can also expect fewer emergency doctor visits.¶

¶Data on File at Align Technology, as of July 12, 2017: Based on a global claims survey by Actionable Research of Invisalign providers, respondents were asked the following question: In what percent of cases do patients require an emergency visit? (Global respondents N=898).

# invisis is their treatment, their transformation.

## first

When you choose Invisalign® treatment, feel confident knowing that Invisalign clear aligners are the #1 doctor-trusted brand of clear aligners for teeth straightening.\* Plus, you get access to a doctor who is trained in transforming smiles every step of the way. The doctor will do a 3D scan of your teen's mouth, so that we can get their treatment rolling.

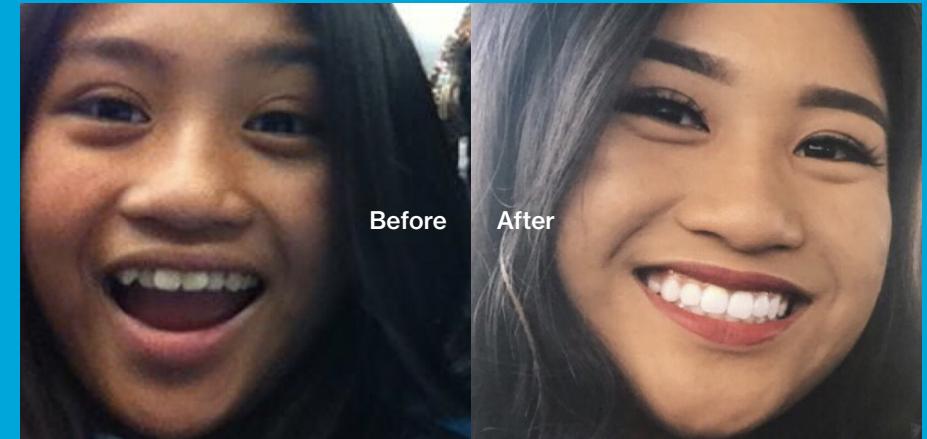

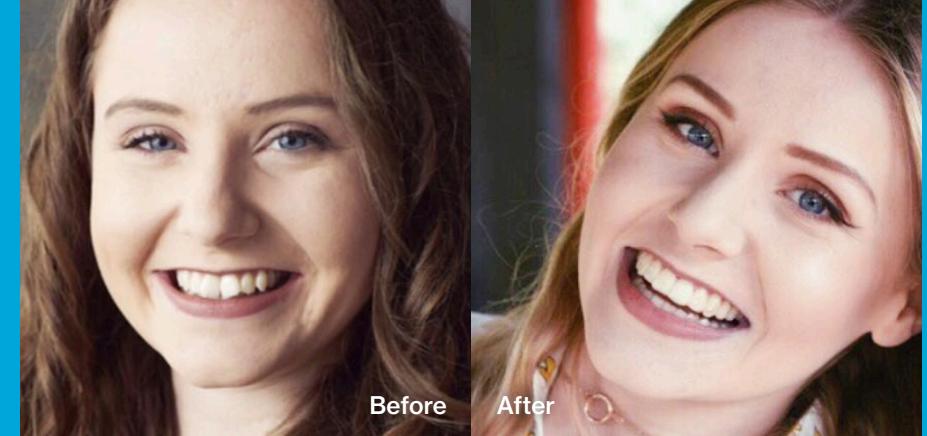

## then

Our clear aligners are designed just for them. Using SmartTrack® material for predictability, SmartForce® features to create the right movements, and SmartStage® technology to produce the movements at the right time, each new aligner they put in gradually moves their teeth closer to their dream smile.

## finally

Bit by bit their teeth will move, and before they know it, they'll have a snazzy new smile that they'll be sure to love.

\*Based on a survey in Feb 2020 by iQVIA. If a dentist (n=250) or orthodontist (n=109) has performed 1+ teeth straightening treatment in the past week, they were asked, "which brand of clear aligner do you trust the most for teeth straightening?" From the list, Invisalign was chosen the most often at the 99% confidence interval. Data on file at Align Technology, as of April 7, 2020.

# invis is finding a payment option for you.

There are lots of ways to make Invisalign® treatment affordable for you. You may be able to use your insurance coverage, pay with tax-free dollars from your FSA or HSA, or arrange a monthly payment plan.

## ➤ What does insurance typically cover?

Many dental insurance plans cover Invisalign® treatment the same way they cover braces. Your insurance may pay for a certain percentage of your Invisalign treatment, or it may pay for a certain dollar amount. Often there is a lifetime cap on the amount insurance will pay for orthodontic treatment.

## ➤ How do I know if my doctor accepts my insurance?

When you book your consultation, ask which insurance plans your doctor accepts. Your doctor's office can also call your insurance provider to check your coverage.

## ➤ What is a monthly payment plan?

A monthly payment plan is an arrangement between you and your doctor to spread the cost of your Invisalign clear aligners over the length of your treatment. Typically, doctors will request a down payment before treatment begins.

## ➤ How can a monthly payment plan help me?

Making small payments throughout the course of your Invisalign treatment rather than all at once can make it easier to plan your monthly budget.

## ➤ How can I arrange a monthly payment plan?

Many doctors offer flexible and affordable monthly payment plans. Before or during your consultation for Invisalign treatment, ask your doctor what options they offer.

Transform their smile, change their life.
